

Automatic Currency Detector **AL200**

ADVANTAGES

- Professional and easy to use detector, but not just for banks
- Immediate and accurate detection
- Forward or reverse filing modes for authenticated banknotes
- Audio and visual alerts to indicate suspicious banknotes
- 2 LED displays: 3 digits (numbers) and 6 digits (total value)
- Works both from electricity and from a power adapter for the car (supplied as a present)
- Update software via internet, easy to maintain
- Affordable price
- Tested and approved by the ECB

FUNCTIONS

4 detection methods: IR (detection of infrared mark's position), MG (detection of magnetic mark's position), banknote's size, and optical density. Indication of the denomination, the total value and the total number of the authentic banknotes.

APPLICATIONS

Ideal for use on the go, in trade offices, by small businesses, and at currency exchanges
