

Automatic Currency Detector **AL310-5**

ADVANTAGES

- Professional and easy to use detector, but not just for banks
- Immediate and accurate detection of suspicious banknotes
- High quality sensors and high sensitivity
- MG sensors automatically self-clean
- Self-diagnostic of all internal sensors when switched on
- Automatically recognition of the type of the currency
- Audio, visual alerts and error codes to indicate suspicious banknotes
- Indicates the denomination, the total value and the total number of the verified banknotes
- Authentic banknotes can be processed forward or backward through the machine
- Works both from electricity and from a power adapter for the car (supplied as a present)
- Power adapter for the car allows use in the office or on the go
- Update software via internet, easy to maintain
- Affordable price

FUNCTIONS

5 detection methods: IR, MG, SPEC, dimensions, density. **(Notice!** Allows only one orientation of banknotes to pass, other orientations are rejected).

APPLICATIONS

The PRO 310 is for any business that could possibly encounter counterfeit banknotes and needs the peace of mind that quality forgery detection provides.
