

# Currency and Documents Detector **AL32/20**

## ADVANTAGES

- Can check multiple banknotes at one time
- Large viewing field | Minimal dilution of UV-light
- Suitable for banknotes of different sizes
- Multiple UV wavelengths target different protection measures on currencies and documents
- Two built-in magnifying glasses allow for checking the banknote under UV light and for checking microtext on the bill
- Built-in magnetic sensor
- Ease of use

## FUNCTIONS

UV-detection (to detect fluorescent security features). White light detection (to detect watermark security features). 10x Magnification (to check micro printing). Size detection.

## APPLICATIONS

Not only is the AL32/20 appropriate for traditional cash handling positions (banks, payroll desks, cashiers, etc.), but it is also well suited to law offices that need to authenticate original documents

## Specifications AL32/20

UV-light detection	16 W (365 nm) and 4 W (254 nm)
White light detection	+
Magnetic detection	+
Built-in magnifying glass, mm	3x and 12x
Scale	+
Dimensions, mm	185x130x120
Net Weight, kg	1,3
