

Currency and Documents Detector **AL32/1500** serie

ADVANTAGES

- Visualization IR-marks on a monitor
- Large screen and video camera guarantee a high quality picture and easy visual control
- Auto start for any detection mode
- Enters into standby state automatically | Can check multiple banknotes at one time
- Built-in magnetic sensor and UV bulb (for AL1500 IUWM)
- External magnification: 10x (supplied as a present)
- Ease of use, compact, fast, efficient

FUNCTIONS

Verification of infrared inks (**Notice!** Detectable banknotes include IR security features hidden in the paper). UV-detection (to detect fluorescent security features). MG detection (to detect magnetic marks embedded in banknotes). External magnification: 10x (to detect micro printing).

APPLICATIONS

Designed for versatility and can be used in any commerce, service, banking business or currency exchanges.

Specifications AL1500 série

	AL1500 IR	AL1500 IUWM
Power of IR-light, W	10	10
Screen size, sm/inch.	10,2/4,01	10,2/4,01
Power of UV and white lamp, W		4/2
Power, V/mA	220 V	
Dimensions, mm	160x180x260	160x180x260
Weight, kg	1,25	1,25
